

ReCon Engines

Factory-remanufactured engines for:

- On-highway applications
- Industrial and construction machines
- Power generation / genset engines

Features:

- Built to new engine specifications
- Critical wear parts (pistons, rings, bearings, seals, gaskets, etc.) replaced 100%
- Optional horsepower and performance upgrades (where offered by Cummins)
- Global warranty and support through Cummins network

ReCon Components & Parts

Examples:

- Short blocks / long blocks
- Cylinder heads
- Fuel system components (pumps, injectors)
- Turbochargers
- Compressors & water pumps
- Major rotating and reciprocating assemblies

Features & Benefits:

- Genuine Cummins remanufactured parts
- Remanufactured to latest Cummins specs using OEM-grade processes
- Cost-effective way to extend life of Cummins-powered equipment
- Quick availability vs full in-shop rebuilds
- Covered by Cummins ReCon warranty

ReCon Gensets

ReCon DG sets are factory-remanufactured gensets designed for customers who need fast, reliable replacement with lower cost and minimal downtime.

Benefits:

- Value for money compared to buying new
- Improved performance and fuel economy vs many field rebuilds
- Avoids uncertain machine-shop delays and variable workmanship
- Easy core exchange and clear commercial process
- Supports sustainability goals by extending equipment life
